

# Product Information Sheet

## Heavy Vehicle Electrical Systems Panel Trainer

This trainer provides students and instructors with the opportunity to demonstrate, investigate and fault-find a simulation of typical diesel electrical systems. The trainer is designed to allow access to a variety of test points for vehicle electrical components, as well as provide an understanding of the overall system layout and configuration. To facilitate the development of techniques in diagnostics and fault-finding skills, the panel includes a range of fault-insertion options to simulate typical real-world system malfunctions.

This trainer includes access to curriculum material including theory and practical learning tasks.

The trainer can also be used in conjunction with our optional cloud-based software, interactive theory presentations, investigations, and assessments, which support the practical activities, carried out using this resource.

### Typical Practical Tasks Include:

- Battery and fuses
- Starter and solenoid
- Horn and relays
- Park, tail and headlights
- Turn signal and hazard warning lights
- Brake and back up lights
- Auxiliary lighting
- Alternator charging systems
- Windshield wiper system
- Cold starting systems
- Troubleshooting

### Items Included:

- Trainer
- Curriculum material
- Wall mounting brackets
- Bench stands
- Accessory kit

### Other Items Required:

- Lab scope
- Digital multimeter

### General Information:

Trainer Dimensions: 900 x 170 x 600 mm (W, D, H)  
Packed Volume: Approx 0.316 m<sup>3</sup>  
Packed Weight: Approx 26 kg

**Order Code: 757-01**
